---

## Summary

---

High-performing student studying computer science with a 2023 expected graduation date. Equipped with corporate experience in Software and Data Engineering roles. Skilled in programming languages such as JavaScript, Python, and GO. Proven ability to work well in a team environment as well as independently. Strong problem-solving and analytical skills. Seeking a full-time software engineering position to utilize my skills and work on impactful projects

## Experience

---

### Reffy Inc. | Atlanta, GA

#### Full Stack Developer | 06/2022 - Present

- Designed and developed reusable React components for a consistent user interface.
- Enabled third-party login and sign up by integrating Firebase Authentication.
- Created reactive pages that communicate with the backend server using API requests.
- Pushed for the adoption of the Scrum Methodology yielding greater development velocity rates.
- Developed backend routes in Go for sending email notifications using SMTP.

### Meta | Menlo Park, CA

#### Data Engineer Intern | 05/2022 - 08/2022

- Developed a dashboard to monitor growth opportunities, including user product adoption, activity, and retention.
- Designed a streamlined ETL (Extract, Transform, Load) pipeline with multiple stages, converting raw data into actionable aggregated information.
- Constructed SQL queries and developed dashboards, providing growth opportunity insights

### Golden Door Scholars | Fort Mill, SC

#### Technology Fellow | 06/2019 - 07/2019

- Led a team of four in a social justice hackathon, resulting in the creation of an informative and responsive website.
- Utilized HTML, CSS, and JavaScript to complete weekly coding challenges and build a professional portfolio website.

## Skills

---

ReactJS, React Native, Git, GitHub, REST, Relational Databases, Data Processing, SQL, Python, Golang, JavaScript, HTML5, CSS3, Front-End Development, JSON, Data Visualization, Java, Agile Methodology, Docker, Protocol Buffers

## Projects

---

**Vote Vault** - A mobile app that serves regional voter information.

### Full Stack Developer

- Established a collaborative GitHub environment for cross-platform development using React Native.
- Integrated APIs (Google Civic Information API, Wikimedia REST API, and YouTube Data API) to display information on elections, candidates, and the voting process.
- Created app wireframes and prototypes using Figma and implemented front-end components

## Languages

---

Spanish(Fluent), Portuguese(Beginner)

## Education

---

### Emory University | Atlanta, Georgia

#### Computer Science | 05/2023

- Awarded the Golden Door Scholarship.
- Maintaining a current GPA of 3.59.
